

Exelon PowerLabs®

The true measure of excellence

Aerospace Calibrations

Exelon PowerLabs has been providing calibration services to the aerospace industry for years. With over 100 years working in highly regulated industries such as nuclear generation and utility companies, Exelon PowerLabs provides the highest, safest level of calibration in the marketplace.

Calibration Capabilities

- Air Velocity
- Dimensional
- Electrical
- Flow Rate
- Force
- Humidity
- Tachometers
- Vibration
- Radiation
- Hydrometers
- Light
- Mass
- Optics
- Pressure & Vacuum
- Sound Level
- Temperature
- Torque
- Valve Diagnostic Equipment

Our Services

PowerLabs is regarded as the leading calibrations lab in the energy industry, having amassed capabilities in virtually all aspects of metrology to service Fortune 500 energy companies. We maintain a broad range of calibration standards under a scope that is accredited by A2LA and ISO 17025, and perform more than 60,000 calibrations annually.

Through our award-winning program, Parts Quality Initiative, we have been able to help companies identify parts with a high-failure rate before installation. Therefore, reducing downtime, labor and logistics costs, and ultimately improve replacement of parts under warranty.

Brands We Calibrate

- Agilent
- Snap-on
- Hewlett – Packard
- Fluke
- Megger
- Mitutoyo
- AMETEK
- Ohause
- Extech
- Dwyer
- Tektronix
- Burndy
